The Group expects that revenue for the six months ended 30 June 2021 will range from RMB14,512.47 million to RMB16,197.97 million, representing a year-on-year increase of 29.12% to 44.12%. In 2021, with the control of the global COVID-19 pandemic and the gradual recovery of the economy, the Group expects that the domestic market will continue to benefit from the favourable policies of the new national standard of second-generation semi-trailers, the promotion of the “new infrastructure construction” and the rapid rise in the demand for cold chain logistics, which in turn realized the growth in overall revenue in the first half of 2021, compared with the corresponding period of 2020. Due to the influence of factors such as the changes to global economy and the prevalent rapid increases in the prices of bulk raw materials, the Group estimated that net profits may not increase in the same ratio as revenue for the first half of 2021 as compared with that of the first half of 2020.

The English version of the above financial information and the description of the main operating conditions of the Group is an informal translation of the Chinese version.
